Hubbard Males

Finally a choice of *males*...

HUBBARD M99

The Hubbard M99 is a white skin male that has been selected to offer producers the best meat to bone ratio at the lowest live cost. This male is desirable in markets where both cost of production and yield are important. It is characterized by strong growth, feed efficiency, and livability as well as exceptional meat yield in the processing plant.

- Uniform and User Friendly Male
- Superior Fertility and Hatchability
- Exceptional Broiler Feed Efficiency
- Robust and Resistant
- Completed with the Hubbard Yield Advantage

HUBBARD M77

The Hubbard M77 has been selected to offer competitive breeder performance combined with efficiencies of modern live cost broiler performance and competitive conformation. The resulting broiler is efficient to grow and can be used over a wide range of bodyweights dependent on the product mix needed at any one time.

Superior to the industry benchmark!
