

Bolegg Perfecta

Easy farm extension

The Bolegg Perfecta system makes it possible to house a higher bird density by increasing useable floor area through the use of tiers. The layout is based on the concept of traditional floor housing which ensures easy management and good results. Manure belts are integrated in the system for periodic manure removal. The system allows integration of feeding and drinking lines, which improves the overview in the house.

Fool proof aviary concept

Based on traditional floor housing
Laying nests located centrally, easy to reach

Easy farm extension

Extra living surface with the system
Easy to install in existing houses
Fits every house width
Quick installation

Low maintenance level
